

Do you want a Septic System over your Well?!?

- ◆ Madison Planning and Zoning received notice of an application for a Zone Change on the Hald property at the junction of Duck Hole and New Road. The request is to change it from the current zoning of RU-2 (two acres per home) to HOD (High-Occupancy Development – whatever can be crammed in). The first phase of development is for a 24 home mixed-income community .
 - ◆ The proposed development is directly over a watershed for public and private wells in Madison, and would introduce a high output septic treatment system and other runoff at the center of a vital aquifer.
 - ◆ This zone change raises water quality, supply and safety concerns.
-

Please plan on attending the
Conservation Commission public hearing:

Monday November 26th 7:30pm
At Town Campus

For more information on the proposed development,
aquifers and 8-30g, please visit:
